Note: 1	If dirty oil is being recycled, the previous use must be stated (i.e. if used in machines contaminated by radioactivity or mineral oil containing PCB's).
Note: 2	Chemicals should be disposed of via the Advanced Materials Group, Building R34 at RAL or Logistics at DL.
Note: 3	Pumps that may have been used for pumping toxic chemicals should be flushed through before being returned to stores.
Note 4:	All radioactive materials should be disposed of via the Radioactive Waste Manager or Radiation Protection Advisor.
